

## **Ocular Manifestations of Cystinosis You Can't Afford to Miss!**

**Donny W. Suh, MD, FAAP, MBA, FACS**

Gavin Herbert Eye Institute (GHEI) & Fellowship Program & Eye Mobile Program  
University of California at Irvine

Cystinosis presents with significant ocular manifestations that can profoundly impact vision and quality of life. This symposium will highlight the latest research in 2025, including advancements in diagnosing and managing corneal cystine crystal accumulation, new grading scale for corneal crystals, and novel approaches like punctal plugs for dry eye management & ocular crystal formation. We will also explore the impact of cystinosis on retinal health and of telehealth. Join us as we discuss groundbreaking developments that are shaping the future of eye care in cystinosis.
